

## Dolphin Watch Chair Assembly Instructions

**Thank you** for your purchase of the Built to Last Dolphin Watch Chair.

Simply follow the directions below and you will soon be ready to enjoy your chairs. Please call us at 877.258.2578 if you have any problems with assembly. Your satisfaction is guaranteed.

First, make sure you have all the pieces as shown below.

Remove the screws from the bags. A square drive bit is included. Start the screws into the countersunk holes on the pieces. The two shorter screws are for the bottom of the back section. Advance the screws into the holes until they protrude slightly from the other side. The protruding screws will help you line up pieces when assembling.

After all the screws are started you are ready to assemble. **Follow the sequence on next page.**

**Keeping your furniture clean:** Maintenance requirements will vary by location. Generally, an occasional rinsing by hose will keep the furniture clean. A pressure washer will do the best job but be careful not to apply too much pressure (which will "feather" the surface). For tough dirt/stains spray Clorox Cleanup or Tilex onto the furniture, allow to sit for a few minutes and rinse off with a hose or pressure wash. Stubborn stains may require a little scrubbing with a scrub-brush. Another option is a mixture of TSP, water and clorox (TSP is found in the paint section of the hardware store).

**Important:** Make sure the pieces being attached are pressed against each other with no gap in between and that the screws are lined up to the predrilled holes. Do not overtighten the screws. Advance the screw until snug. **DO NOT OVERTIGHTEN!** If your drill is not variable speed be very careful not to drive the screw in too far.

**Step 1:** Pieces are numbered to easily match up. Apply pressure and keep the drill lined up straight.

**Step 2:** If you get a gap between pieces, back out the screw, apply pressure to the pieces and re-screw.

**Step 3:** A picture is worth a thousand words? Please let us know if you had any trouble following these instructions.

**Step 4:** Attach the back section and then the arms.

Enjoy the view!!!
